SEEDS • BULBS • PLANTS

To professional horticulturists and garden enthusiasts we present our Autumn 1938 Catalog.

We hope browsing through its pages will afford helpful suggestions and enable you to capture the enduring beauty in gardens that turn out as you desire them.

Surely few creative activities at like expenditure afford such fascinating diversion, physical well-being and mental relaxation.

Identical quality is the only true basis of price comparison. In planning your budget keep in mind no initial saving can compensate for the ultimate disappointment that follows the use of inferior stock.

SUPERINTENDENTS AND GARDENERS

We maintain contact with available estate superintendents, farm managers, gardeners and greenhouse assistants. We recommend only those we know to be competent men and whose references bear thorough investigation. The facilities of this service are extended to employer and employee—without charge.

Andrew R. Kennedy, Inc., give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned. All claims must be made within five days after receipt of goods.

TERMS: Net Cash; 6% interest after sixty days.

Owing to the unusual conditions, prices are subject to change.

GREY CRAIG
NEWPORT, R. I.

March 28, 1938.

Gentlemen:

Under separate cover I am mailing photos of the hardy Lily Garden I staged at the Boston Show last week. There were 4000 Lily flowers in this exhibit. All of the twenty-two varieties that you sent forced beautifully and when Mr. Craig, the eminent Lily specialist, said that it was the most comprehensive collection of hardy Lilies he had ever seen in bloom at one time, I felt well paid for my efforts.

I want to compliment you on your success in treating and holding these bulbs for me and greatly appreciate the quality of stock you delivered, which was certainly a factor in the excellent result.

I might also add I received firsts at the same Show for the Lilium Harrisii, Freesias, Dutch Iris, and Calla Elliottiana from bulbs supplied by you.

Again thanking you for your interest and, as I look forward to another year, I expect you to continue to deliver Kennedy Quality exhibition bulbs.

Very truly yours,
JOSEPH A. WINSOCK.
(Supt. to Mrs. M. M. Van Beuren)

PLEASE NOTE: We list the twenty-two varieties of Lilies in this garden on page 34.

Glen Cove, Long Island,
March 26, 1938.

Gentlemen:

This is to inform you that the Freesia group which I exhibited at the International Flower Show last week was awarded first prize.

For the second consecutive year I think the exhibition bulbs you shipped for this purpose were a real factor in my success.

Inasmuch as I like to see such efforts rewarded you may use the photograph of the group as per your request at the Show.

Yours very truly.

FREESIAS

GREENHOUSE GROWN BULBS

We wish to call your attention to our list of greenhouse grown Freesia bulbs. All the varieties in this box are greenhouse grown, in sterilized soil. While such bulbs are more costly to produce we cannot recommend their use too highly when the result is compared with that of field grown bulbs. Another advantage to be gained from greenhouse grown stock is their response to early forcing which makes a Freesia crop certain for the Christmas holidays.

GOLDEN DAFFODIL. Best Yellow Freesia yet introduced. Flowers borne on tall, stiff stems, beautiful Daffodil yellow in color; excellent keeping qualities.

Extra Selected Top Size Bulbs. (Stock limited). 100, \$7.50.

Extra Selected Bulbs. 100, \$5.50; 1,000, \$52.50.

MARYON. The best blue Freesia to date and in competition has no equal in the blues. It flowers easily for Christmas, producing large open clear blue flowers on strong wiry stems. Two and occasionally three breaks from a single bulb is characteristic of its strong habit. Awarded a plant patent

(No. 32) to the grower for whom we are distributors.

Extra Selected Top Size Bulbs. 100, \$17.00; 1,000, \$165.00.

ORANGE GLORY. New last year. Introduced by the same hybridist who patented Maryon. We believe Orange Glory is destined to lead in its color as Maryon has established itself as the best blue. A soft buff-orange color with deeper throat. It is a little later than Maryon but its habit and growth otherwise are identical.

Extra Selected Top Size Bulbs. 100, \$15.00; 1,000, \$145.00.

CALIFORNIA GROWN

ACHIEVEMENT. Discarded for Orange Glory.

APOTHEOSE. A giant lavender-pink of waxy substance. Long strong stems.

Extra Selected Top Size Bulbs. 100, \$10.00; 1,000, \$95.00.

ELDER'S GIANT WHITE. One of the best white Freesias. The flowers are pure white, very large, measuring over 2 inches in diameter on very stiff stems. Will not stand early forcing.

Extra Selected Top Size Bulbs. (Stock limited). 100, \$10.00; 1,000, \$95.00.

Extra Selected Bulbs. 100, \$6.00; 1,000, \$55.00.

ELDER'S DOUBLE WHITE. Same as Judy but color pure white.

Extra Selected Top Size Bulbs. 100, \$15.00; 1,000, \$147.50.

ELDER'S DOUBLE FREESIA, JUDY. Golden yellow in color, this Freesia appears twice its actual size. Stands up well on long stout stems and is delightfully fragrant. A novelty of merit.

Extra Selected Top Size Bulbs. 100, \$15.00; 1,000, \$147.50.

GIANT PURITY. After years of reselection we are now able to offer this new strain of Purity Freesia in quantity. A strong grower, free flowering, early, and the flowers do not split. 100, \$8.00; 1,000, \$75.00.

GOLDEN DAFFODIL.

Extra Selected Bulbs. 100, \$5.00; 1,000, \$45.00.

GOLDEN TREASURE. Immense golden yellow flowers tinged with lavender on long, graceful stems. Has wonderful lasting qualities.

Extra Selected Top Size Bulbs. 100, \$7.50; 1,000, \$70.00.

JOAN MANDA. Pure white. The largest Freesia yet introduced. In spite of careful reselection of planting stock, this variety tends to weakness in the stem. We do find, however, that as a result of planting about half the usual quantity of bulbs per pot the stems are much stronger.

Extra Selected Top Size Bulbs. 100, \$12.00; 1,000, \$115.00.

MRS. MARC PETERS. A fine pink. Deep salmon-rose with orange blotch on lower petals.

Extra Selected Top Size Bulbs. 100, \$8.00; 1,000, \$75.00.

PENSEROSA. Enormous broad-petaled florets colored soft carmine-rose. The throat is primrose with slight carmine markings. The stem is heavy and long.

Extra Selected Top Size Bulbs. 100, \$15.00; 1,000, \$147.50.

ROSY MORN. Discarded for Penserosa.

SHROEDER'S WHITE PERFECTION. Patent No. 237. Earlier than Purity and twice as large, with 24- to 30-inch, stiff stems.

Extra Selected Bulbs. 100, \$8.00; 1,000, \$77.50.

Extra Selected Top Size Bulbs. 100, \$12.00; 1,000, \$115.00.

TANGERINE. Discarded for Orange Glory.

WHITE CHIEF. Pure white flowers of good size borne on long, wiry stems but not an early forcer.

Extra Selected Top Size Bulbs. 100, \$6.00; 1,000, \$55.00.

Gladiolus Tristis, Supreme

This photograph of a greenhouse bench of Gladiolus Tristis, Supreme, was taken in early February, 1938. The Supreme is a reselection which is a stronger grower with upright flowers better placed on the stem. In addition, the flower is delightfully fragrant, and will stand cut a week in good condition. There is only one color in Gladiolus Tristis, cream-white. As a result of numerous inquiries for pink and yellow we exhibited the cut flower dyed yellow and rose-pink at our booth at the International Flower show this spring. The exhibit was so enthusiastically received that we gladly recommend the procedure to our customers who purchase this item. The cut flowers should be plunged into the dye from 2 to 3 hours, the intensity of the color depending upon the strength of dye solution.

Price: 100, \$15.00; 1000, \$145.00.

Twelve pots of our Lilium Harrisi which won first prize at the International Flower Show, March, 1938, exhibited by S. A. Salvage, Esq., Thos. Chadburn, Superintendent. The fourth consecutive year that Kennedy Kwality Lilium Harrisi have received first prize.

LILIUM HARRISI

Our strain of Lilium Harrisi has again proven its superiority at the leading Flower Shows during the past season.

This is the true Easter Lily from Bermuda and is a strong grower with good foliage producing a cluster of long, glistening pure white tubular shaped flowers of heavy substance. The first of the new crop Lilies to arrive, usually during August, and with careful forcing may be had in flower for Christmas.

Our growers' fields in Bermuda are entirely free from disease and stock supplied by us has been consistently free from mosaic.

NARCISSUS arranged for effect

Kennedy Kwality Exhibition Collection Narcissus

With many of the best exhibition varieties of Narcissus priced at twenty-five dollars a bulb we hesitated to offer a collection because to include the leaders in their respective divisions would make the price almost prohibitive. In the past five years our grower has increased his stocks of these novelties and this year we offer a comprehensive list of varieties to include the finest in all classes. Any exhibitor can begin this year, if he only buys a few of each variety, and soon have a collection complete in color range, including all types.

POETAZ VARIETIES

The demand for these satisfactory hybrids of Ornatus X. Polyanthus is again increasing steadily, as before the quarantine. Deservedly so, for there is no better group of Narcissus for indoor culture in pots and in bowls, while their hardiness outdoors, often questioned, leaves nothing to be desired if planted on time.

ABUNDANCE. Deep yellow perianth, sulphur-yellow cup. Robust growing variety. Doz., \$2.10; 100, \$15.00.

Aspasia. Superior to Elvira, more florets per stem and perianth purer white, also larger. For forcing Aspasia is greatly to be preferred. Large white perianth with yellow crown. Doz., \$1.60; 100, \$12.00.

CHEERFULNESS. Double white Poetaz hybrid, 3 to 4 large flowers on a strong stem. While the general effect of the coloring is white, there is a suggestion of pale yellow at the base of the petals which gives character to the entire flower. Stands out as one of the best and most charming introductions. Proven hardy in New England. Doz., \$2.30; 100, \$16.00.

EARLY PERFECTION. The earliest of all Poetaz. A great improvement over Elvira, 6 to 8 flowers per stem, white with yellow cup. Can be forced to bloom in early January. Doz., \$2.10; 100, \$15.00.

Elvira. Pure white petals, yellow cup; 2 to 4 florets on tall, sturdy stems. Good forcer, not early. Doz., \$1.60; 100, \$12.00.

GERANIUM. Large pure white perianth with a magnificent orange-red cup. Four to six flowers on a stem. Truly an exhibition variety. Doz., \$24.00; 100, \$190.00.

POETICUS (Poet's Narcissus)

The petals are white, the yellow wide-mouthed cup, edged bright orange or red is sometimes all red, all are sweet-scented.

Kennedy Kwality Darwin Tulips—continued

The Darwin Tulip is of the later-flowering class. For beds and borders we recommend the following varieties for their stately bearing and rich colors. These Tulips grow from 24 to 34 inches high, the flowers are borne on strong stems and are of the finest shades known among flowers.

They excel all other Tulips in color, ranging from softest pink to deep red, blue, mauve, and lavender to black, white and yellow.

Great care has been exercised to select only the best varieties in each color class. However we are in a position, through our growers in Holland, to supply any variety requested if ordered before August 15th. Kennedy Kwality Lawn Grass Seed

For Permanent Lawns of Putting Green Texture

HOW TO MAKE A LAWN

The ground should be thoroughly prepared; that is, the soil should be fertilized, then turned over to a depth of six inches and pulverized. Sow good seed (which is very essential) roll the ground and cross roll in order to press the seed firmly into the soil. The proper time to sow grass seed depends upon the latitude. In the central and eastern states seed may be sown from March 1st to the end of June. Seed may be sown in the fall, from the first part of August to the end of October. Sow, if possible, when the ground is moist. For seeding a new lawn use 5 to 6 bushels to the acre.

KENNEDY'S BENTURF

Reg. U. S. Pat. Off.

Lawn Grass Seed Mixture (Bent Formula)

The popularity of golf in recent years has made comparison of lawns and putting greens an easy matter. One hardly expects his lawn to look as perfect as a putting green, but this is possible if sown with Kennedy's Benturf Lawn Grass Seed Mixture. With reasonable preparation and care excellent results have been accomplished with our Kennedy's Benturf Lawn Grass Seed Mixture which contains a large amount of Bent seed. This makes a compact, rapid growth, forming a close sward withstanding wear and tear. Lb., \$1.50; 5 lbs., \$7.00; 25 lbs., \$32.50; 100 lbs., \$125.00.

Lawn Grass Seed Mixture

(Formerly Kennedy's Green Velvet)

This is the lawn grass seed mixture which for over 25 years has seeded many of the most beautiful lawns in America under the name of Kennedy's Green Velvet Lawn Grass Seed Mixture. Recently worthless mixtures bearing the trade name "Green Velvet" have been marketed to the confusion of our patrons. To avoid this confusion we have changed the name to KENNEDY'S GREENTURF LAWN GRASS SEED MIXTURE. The seed in this mixture is all re-cleaned and especially adapted to withstand the heat and drought of the summer. When properly sown and cared for GREENTURF will produce a beautiful green lawn the entire season. Lb., 75c; 5 lbs., \$3.60; bu., \$14.00; 100 lbs., \$65.00.

KENNEDY'S KWIKTURF

Lawn Grass Seed Mixture

Where a quick turf is desired which will remain green with a minimum of care and attention we recommend this mixture which is composed of deep rooting, strong growing grasses. Lb., 45c; bu., \$8.50; 100 lbs., \$40.00.

KENNEDY'S SHADETURF

KENNEDY'S TERRACE MIXTURE

A mixture of strong, deep-rooted grasses for banks and terraces. Although the grasses are strong and deep-rooted, they will produce a fine, green velvety surface, and also prevent washing away during heavy rains. Lb., 85c; 5 lbs., \$4.00; bu., \$15.00; 100 lbs., \$70.00.

LAWN CLOVER—Dwarf White

The only variety suitable for lawns. Very dwarf and of a spreading habit. We advise sowing White Clover separately on account of the seed being much heavier than that of the finer grass seed. It has a tendency to work to the bottom of the receptacle it is being sown from and consequently the last part of the grass seed sown has a greater percentage of clover than the first. Lb., 85c.

KENNEDY'S PASTURE MIXTURES

FOR PERMANENT PASTURE
AND HAY CROPS

Our Permanent Pasture Grass Seed Mixtures contain only grasses most suitable for this purpose. The result of sowing Kennedy's Permanent Pasture Mixture is a successive growth of rich, succulent grasses from early spring until late fall.

We recommend, in good soil, sowing 80 lbs. per acre or in poor soil 100 lbs. per acre. We also suggest sowing an additional 10 lbs. of Red Clover, in either case, to the acre.

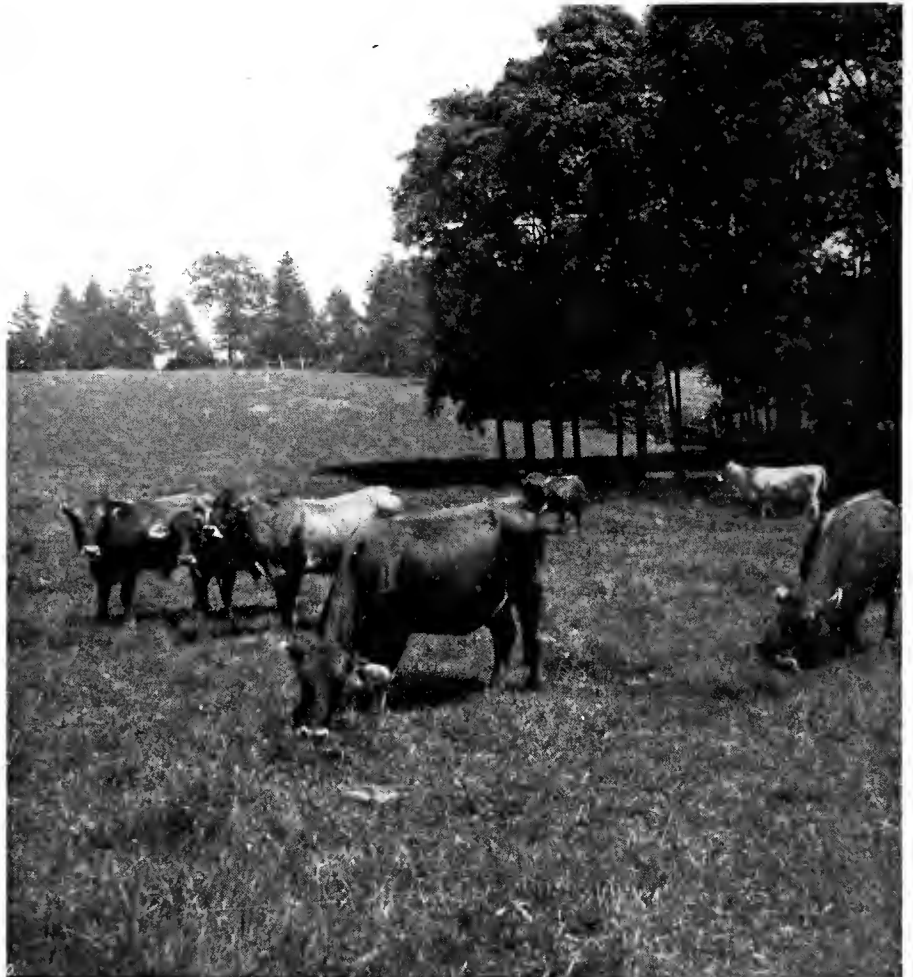

Permanent Pasture Grass seed may be sown either spring or fall but we advise sowing Clover in the spring only.

When ordering state whether your soil is sand, clay, moist or dry so that the proper proportions of the various grasses may be used.

A—For Light Soil. Sow 100 lbs. per acre. 100 lbs., \$45.00.

B—For Wet, Heavy Soil. Sow 100 lbs. per acre. 100 lbs., \$50.00.

C—For Woodland Pastures. Sow 100 lbs. per acre. 100 lbs., \$55.00.

PANSY, Kennedy's Long Stemmed Imperial Giants

PANSIES. H. H. P. Sow the seed about August 1st in a well-prepared partly shaded bed; transplant 6 inches apart. The plants should be strong enough by December to go through the winter with only a few inches of leaves or hay for protection. Remove the covering about the end of March. Seed may be sown outdoors early in April in well-fertilized soil.

KENNEDY'S LONG STEMMED IMPERIAL GIANTS

The Pansy has been a garden favorite since the middle of the 17th century. In recent years, hybridizers have developed the size of flower and length of stem to such an extent as to make descriptions inadequate. To convey a true picture of the infinite perfection of form, range of color, texture of petals, and length of stem, produced by our mixture of Long Stemmed Imperial Giants, is impossible.

Six years ago we offered Kennedy's Long Stemmed Imperial Giants in mixture only. With their free flowering habit and wide range of sombrous shades of soft velvet, we do not hesitate to proclaim Kennedy's Long Stemmed Imperial Giants the finest Pansies in cultivation today.

We are now glad to be able to offer this same strain in fixed named varieties, in addition to the mixture. Because the best flowerers are shy seeders, the price of a good strain is necessarily high.

Oval in shape, firm flesh and all red throughout	\$15.00	Imperial. (Improved Champion).
